

# Escalade Trad Annot

## Les Crasseux (7a)

Secteur Vire Inter – between routes 45 and 45a

description:

Part1 -The route starts of with an easy mantle leading into a short and sandy off-width (right side in and extend your pro when placing deep inside the crack). Shovel your way through the steep part to a good handjam into a powerful finish on fingerlocks. The horizontal band gives a welcoming no-hands rest.

Part2 – Standing on the ledge brings you to a short bulge with and elegant and sporty move to some good jugs onto an other horizontal band. From here starts the sequential crux with small placements and subtle moves.

Part 3 – On the big ledge look up and enjoy the imposing view. Start into the finger splitter and traverse right to directly under the roof. Get your rack sorted, shake out and do a few powerful moves into the very steep fistcrack dihedral to an easy topout. Here you find a two-bolt anchor (unseen from below).

recommended rack:    60 m double-rope  
                                  Ballnut #3  
                                  Alien - blue, green & yellow  
                                  BD # .75, 1  
                                  BD # .5, 2, 3, 4 - double

FFA: Niek de Jonge (6 januari 2012)
